

Bill Scott's Line Reducer Experiment

Before Picture—March 2007

After experimenting with his eyes, Bill decided to see how the product worked on his right (viewed on the left) laugh line. He used only the Targeted-Action Line Reducer (no other skin care products) on the one laugh line every night before bed. You can see the improvement .

After Picture—May 2007

Also note the improvement in the eye on the right above. He began the Line Reducer on this eye in March. Next experiment: MKMen's skin care products!

Bill Scott, the husband of Senior Sales Director Donna Bayes-Scott, is a professor of chemistry and physics at Ft Hays State University, Hays, Kansas.

Bill, thanks for being such a great sport!

Lovey Donna
