

# POWER START PLAN

Special thanks to Ann Shears, Million\$ Exec. Sr. Sales Director who created this Awesome Plan

What if you committed just 1 Saturday & had 3 hostesses to each bring 2-3 guests to your home for a "Girl's Day out." This would be 1 presentation but is considered 3 parties (hostess plus 2 = a party). At this presentation, there are 9-10 people (3 hostesses & 6-7 guests). So what if you did this 3 times on that day at 11am, 2pm & 4pm. You would have had 30 people to try the product in a 6-8 hr day. You could also choose to do this 2 hours on 3 different days, your choice, but what a WIN-WIN!

Scenario #1*		Scenario #2*		Scenario #3*	
# of Faces	30	# of Faces	30	# of Faces	30
\$50 Avg per face	\$1,500	\$100 Avg/Face	\$3,000	\$150 Avg/Face	\$4,500
Profit from 8 hrs	\$750	Profit from 8 hrs	\$1,500	Profit from 8 hrs	\$2,250

Compare these results of 8 hours on your current JOB (Assumption: You work only 8 hours per day)

Find your salary on the chart & compare what you earn in 8 hours (before taxes) on your job to what you CAN earn from 8 hours of party presentations in your MK business. Even at the \$50 per face level should be compared to what you earn in a 8-hour day; i.e., \$50K salary = \$208.33 in 8 hrs compared to \$750 in profit from your MK sales in 8 hours. \* Your results could be more or less but the challenge is to give it a try & by all means, share your results!
